ABOUT US !

WHO WE ARE

Real Dekor is an edgbanding brand owned by Realmak Bicak Makine Sanayi ve Tic.Ltd Sti. The foundations of the company were established in 2016 by Alper Yilmaz and Recep Kayis, who have 20 years of experience in furniture edgbanding production.

We become a solution partner to our customers with our experience in machine manufacturing as well as with our knowledge and experience we have gained in the use of these machines in production.

OUR MISSION

TO BE TRUSTWORTHY...

Our mission is primarily honesty and integrity. It is the complete and accurate presentation of technical features such as thickness, width, content, quality, as we promise to our customers.

OUR VISION

STAYING TRUE TO OUR MISSION

Our mission will form the foundations of our vision. Our vision is primarily to be recognized as one of the most honest companies in the sector and to offer the most accurate and high quality products to our customers at the most reasonable prices and most reasonable quantities.

PVC EDGE BANDING

UNICOLORS

We can produce any solid color you want, whether natural or matte, as on the original panel. Our solid colors do not fade or change color over time. It is scratch-proof, wear-resistant and impact-resistant.

Except for standard colors, our minimum order quantity for solid colors is 15 boxes per thickness and color.

PVC EDGE BANDING

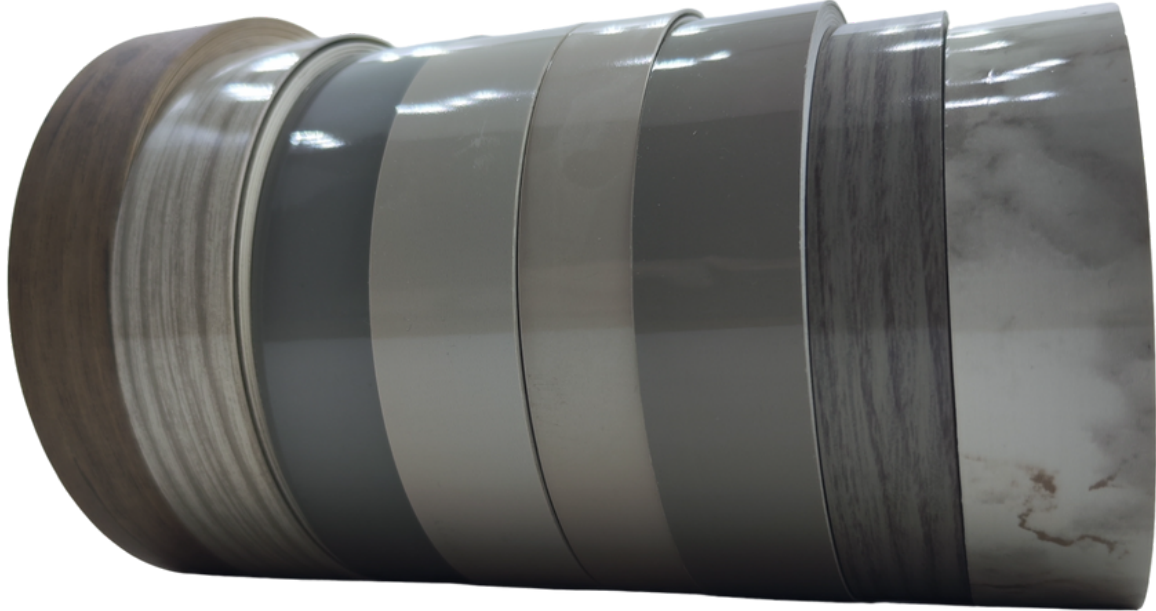

WOODGRAIN COLORS

By using the different surface structures we have, we can match the wood patterns and colors you want in accordance with the surface structure and pattern of the original panel.

We can produce any wooden pattern you want, whether natural or matte, as it is on the original panel. Thanks to our latest UV Printing technology our wood colors do not fade or change color over time. It is scratch-proof, wear-resistant and impact-resistant.

Except for standard colors, our minimum order quantity for wood colors is 10 boxes per thickness and color.

PVC EDGE BANDING

HIGH GLOSS

It is a product that has emerged to produce bright edgebanding for the bright panels in decoration and furniture. With a clearer definition, it is called a high gloss, shiny and smooth PVC edgebanding for the high gloss panels.

We have Solid Colors & Woodgrain colors for High Gloss edges. You can also have Stone, Marble and Textile designs in our swatch.

The surface of this type of edgebanding is coated with a special glossy lacquer by using the latest UV printing technology that has certainly resistance to scratches and impacts.

PVC EDGE BANDING

SOFT TOUCH & SUPERMATT

Soft Touch and/or Supermatt edgebanding is a product that produced with advanced technology with a silky surface feel and pastel color appearance that has scratch resistance in accordance with European Standards.

That kind of edgebanding products matches with the panels that is produced with the same technology which has soft touch feeling with the supermatt appearance surfaces.

Woodgrain colors are available as well as the solid colors.

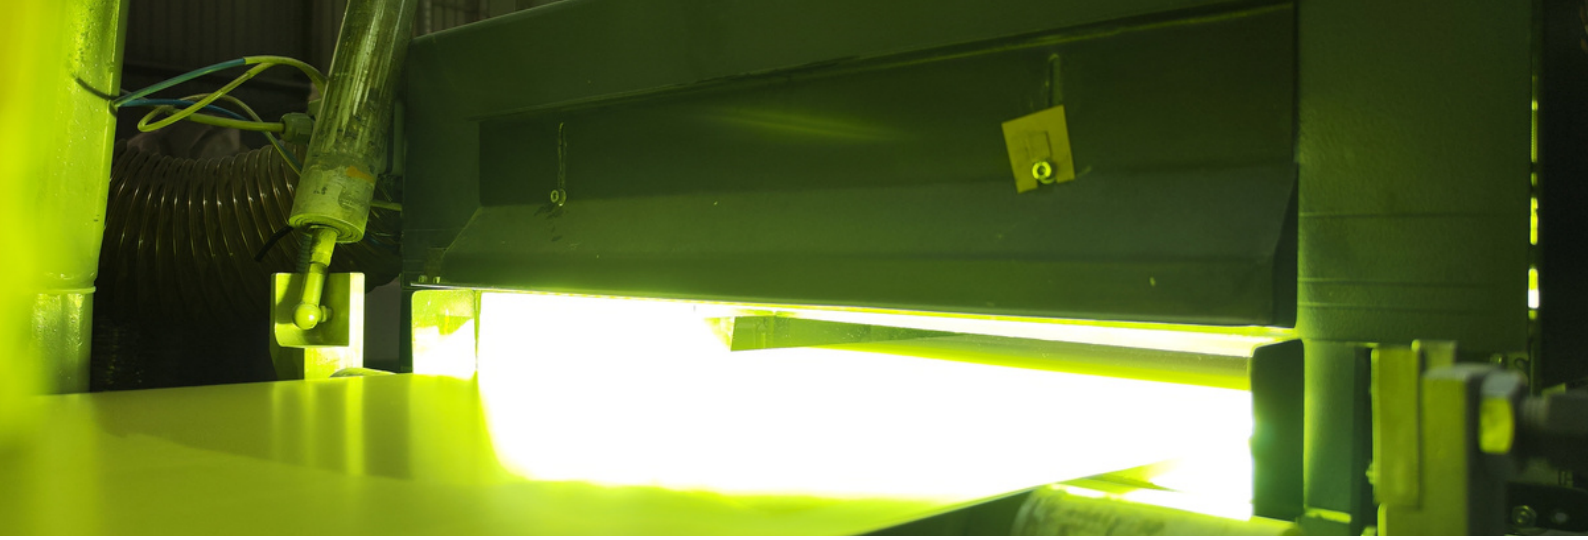

The surface of this type of edgebanding is coated with a special supermatt lacquer by using the latest UV printing technology that has certainly resistance to scratches and impacts.

PVC EDGE BANDING

PRODUCT	PVC EDGE BANDING
THICKNESS	0,30MM-2,00MM
SLITTING WIDTHS	16MM-430MM
RANGE	UNICOLORS WOODGRAIN HIGH GLOSS SOFT TOUCH & SUPERMATT STONE, MARBLE, TEXTILE
PRODUCTION METHOD	EXTRUSION BY CALENDERING TO JUMBO ROLLS

PVC EDGE BANDING

UV PRINTING TECHNOLOGY

UV printing is a more durable and high quality printing compared to other printing methods. In UV printing, micro-sized dye particles process the product and print is obtained by drying with ultraviolet rays as soon as the dyes touch the product surface. Thanks to UV printing, the drying time of the paints is less than 1 second.

Due to its structure, UV paint is not affected by factors such as sun, dust, impact and does not fade.

Inks dried with UV rays after printing are not harmful to human health. Products produced with inks that do not emit gas can be used with peace of mind even indoors.

PVC EDGE BANDING

PERFECT ADHESION

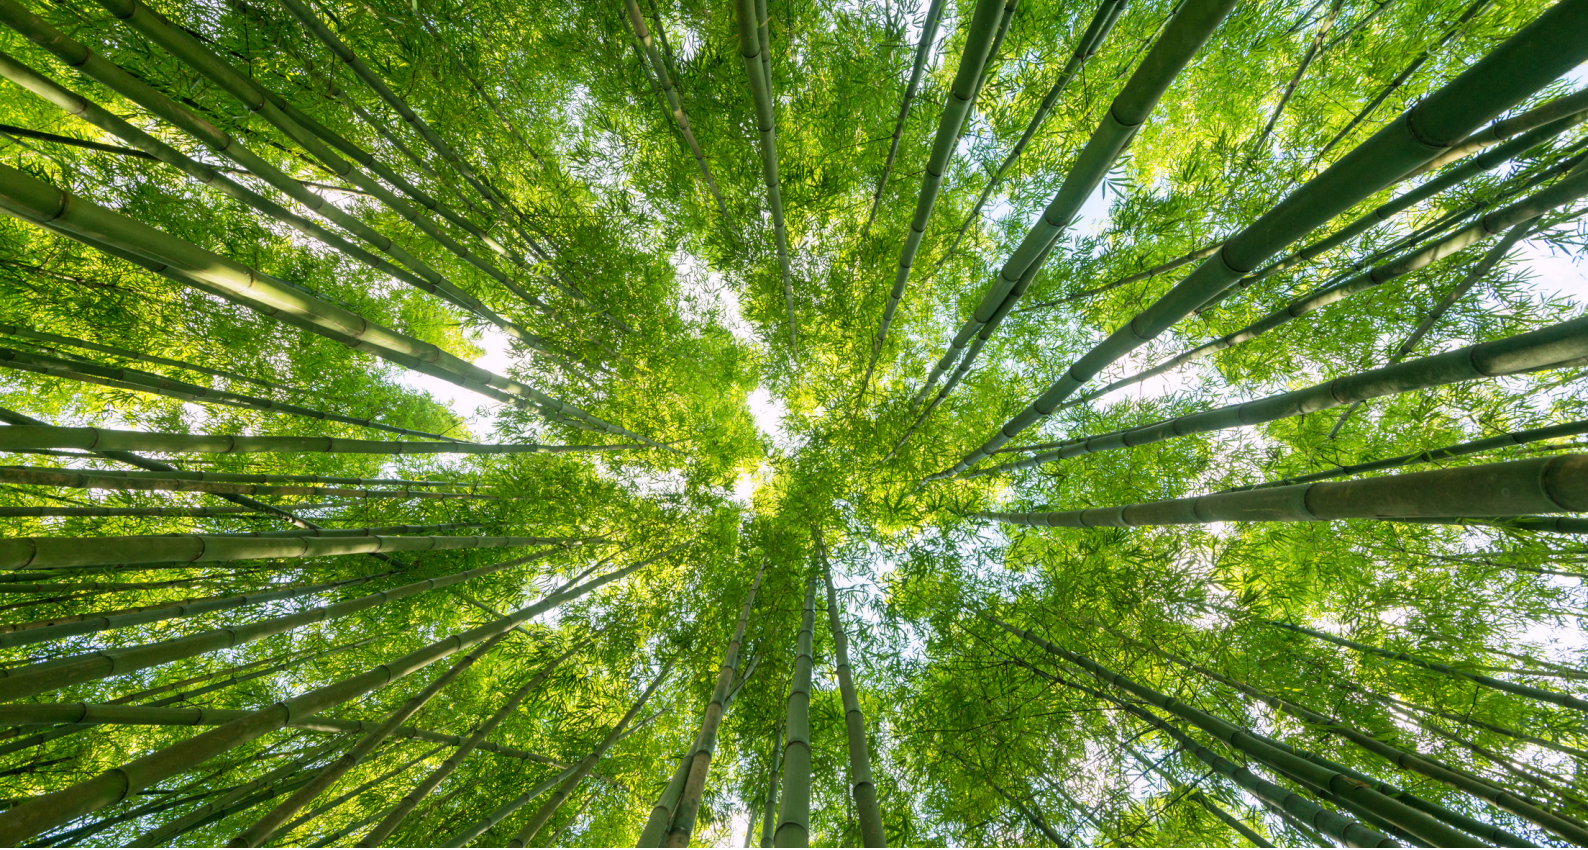

Primer, also known as adhesion reinforcements or chemical bridges, acts as an additional bonding layer between the material and the adhesive, increasing the bond strength.

It is frequently used on surfaces where adhesive strength is insufficient or in applications where high resistance to moisture and heat is required.

In our production, JOWAT branded primers produced with superior German technology are used.

PVC EDGEBOARDING

**WE CARE ABOUT THE ENVIRONMENTAL AND
HUMAN HEALTH OF THE WORLD WE LIVE IN.**

PVC edgobanding produced under Real Dekor brand is produced with safe, high quality and certified raw materials that do not pose threat to the environment and human health. Lead and DOP based additives are not used at any stage of production.

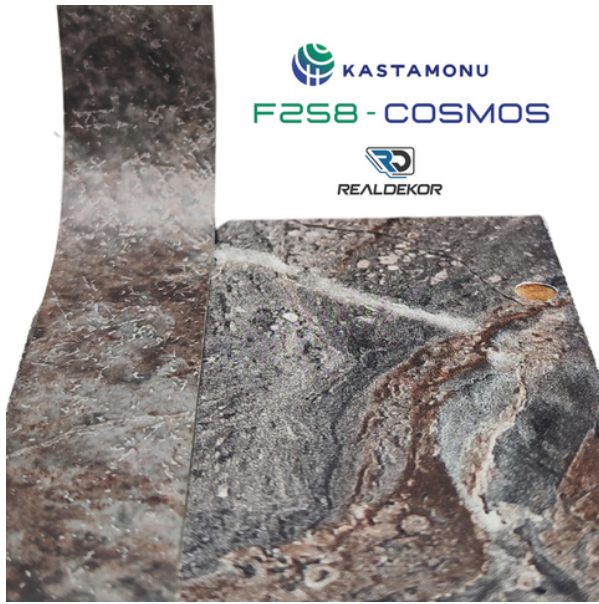

There are no elements that could pose a threat to the environment or human health at any stage of our production, including our extrusion and UV printing lines.

Inks dried with UV rays after printing are not harmful to human health. Products produced with inks that do not emit gas can be used with peace of mind even indoors.

REALBOND

HOT - MELT GLUE

REALBOND

As REALDEKOR, we offer auxiliary materials related to edgbanding in furniture manufacturing to the service of our valued customers with the REALDEKOR brand and quality, in order to meet the needs of our customers from a single point.

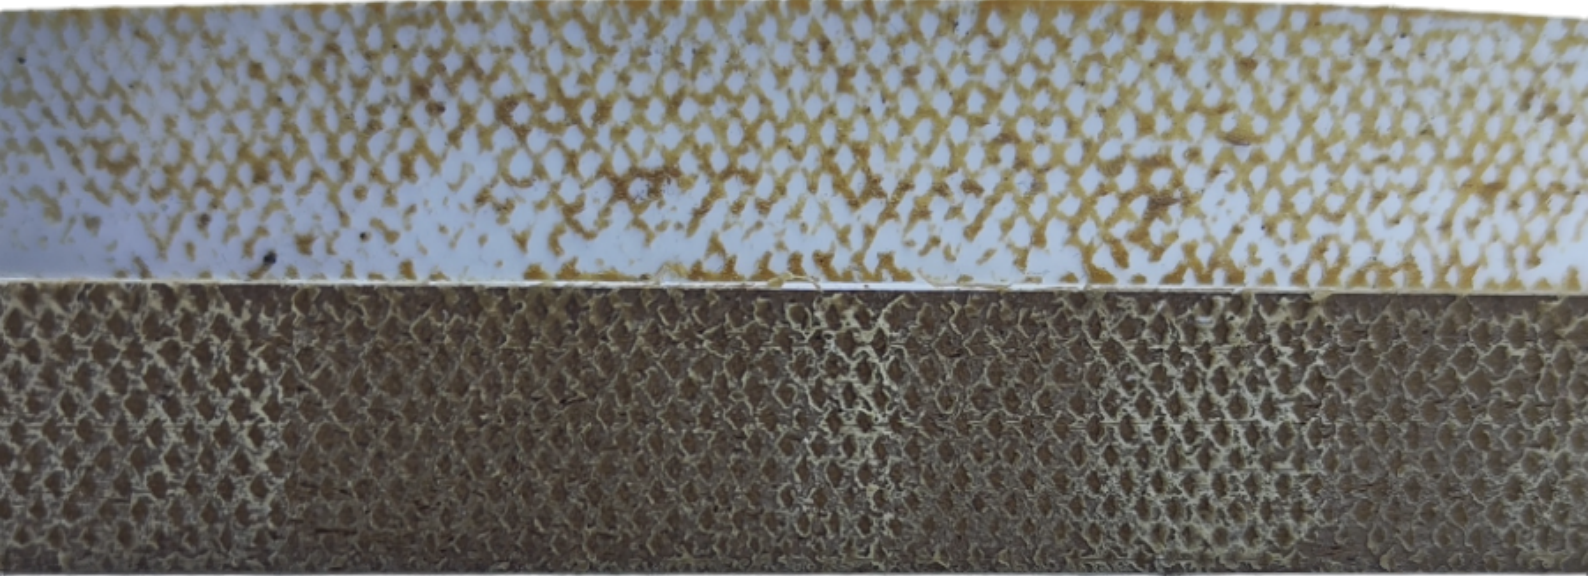

For this purpose, we introduce our REALBOND RB-2004 Hot-Melt Glue.

HOT - MELT
GLUE

REALBOND

RB - 2004

REALBOND RB - 2004 is a product with a very high viscosity and gives good results in all conditions. It is used in straight edge banding processing.

Thanks to its high adhesion strength, when applied to the edgebandings which has a good quality primer on, it ensures flawless adhesion of straight edges.

It is resistant to temperature changes and humid environments, however it is recommended to create the right environments for the product to work.

It works flawlessly on all types of automatic edge banding machines as long as the correct settings are made.

It is fluid even at low temperatures during application, thus saving energy. It is extremely easy to use and provides a clean application. It can be used on plastic edgebanding, wooden edgebanding and melamine edgebanding.

HOT - MELT GLUE

REALBOND

RB - 2004

TECHNICAL FEATURES	
APPLICATION TEMPERATURE	180 - 200 °C
VISCOSITY	65000 ± 5 000 MPAS AT 200 °C
DENSITY	1.35 G/CM ³
SOFTENING POINT (RING AND BALL)	95 ± 3 °C
FEED SPEED	24-30 M/MIN

HOT - MELT GLUE
